Straßenbahnen AG BOGESTRA  
Bochum, Germany**

340 Buses, 90 Light-Rail Vehicles

### Project Highlights

- 310 ticket machine for buses
- 100 ticket machine for 50 light-rail vehicles
- Equipment for 189 pre vending stations
- Equipment for 19 pre vending stations in customer service areas
- Cashless payment via pre-stored value bank card
- Logical positioning for traffic signal priority
- Controlling of on-board electronic components

At the beginning of the 19th century the Ruhr Basin – in which Bochum and Gelsenkirchen are located – became the biggest European industrial area.

Local service is carried out by the BOGESTRA, a joint venture between the cities of Bochum and Gelsenkirchen. There is a single underground Stadtbahn line connecting Bochum to Herne, and several tram lines connecting to Gelsenkirchen and Witten. Public transport in the city is carried out according to the fare system of the VRR transport association.

### INITs Products und Systems

- EVENDintegral
- EVENDportable
