Project Partner

Regional Transit South Thuringia

Kommunale Personennah-Verkehrsgesellschaft Eisenach mbH (KVG), Germany

90 buses

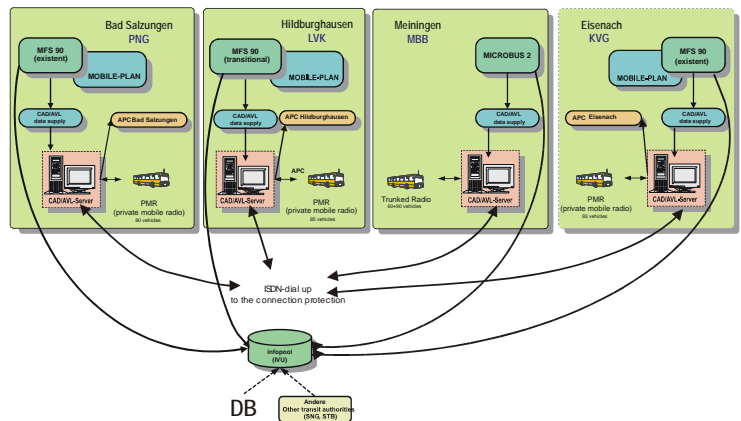

Project Highlights

- Intermodal Transport Control System – ITCS (former CAD/AVL)
- JAVA technology
- Connection Protection
- Monitoring of on-board components
- Communication via data radio
- Real-time passenger information
- EVENDintegral ticket machine and on-board computer
- Planning software
- Statistic software
- Polling data radio system

Interfaces To:

- Connection Protection via standard VDV453-Interface to Bad Salzungen, MBB Meiningen, and LVK Hildburghausen

The Wartburg is the towns' landmark. According to legend, the Wartburg was founded in 1067 by Ludwig der Springer (Ludwig the Jumper). With him began the unprecedented development of the "Ludovinger" family, who ruled for more than 200 years as the most influential princes in the Holy Roman Empire of the German Nation.

In December of 1999, the Wartburg was placed on the UNESCO World Cultural Heritage list.
