

## Reference

Project Partner

### Nahverkehr Schwerin Schwerin , Germany

40 buses, 30 trams, 6 trains

Date of Award: 2003

Contract Value: 0.63 Mio Euro

Project Highlights

- Automatic Passenger Counting System on 76 vehicles
- Wireless LAN data/software transfer. Access point located at the garage
- Passenger count data matching and validation
- Statistics software for analysis and reporting of passenger counts and other information

Schwerin is a town in Northern Germany. It is the capital of the state Mecklenburg-Western Pomerania. The population as of 2005 is almost 100,000. Schwerin is surrounded by lakes. The largest of these lakes, the Schweriner See, has an area of 60 km<sup>2</sup>. In the midst of the lakes there was an Obotritic settlement as early as in the 11th century. The area was called Zuarin, and the name Schwerin is obviously derived from that designation. In 1160 Henry the Lion defeated the Obotrites and captured Schwerin. The town was subsequently expanded into a powerful regional centre. The landmark of the city is the Schwerin Castle, located on an island in the lake of the same name. It was for centuries the residence of the Dukes of Mecklenburg and today is the seat of the Landtag (state parliament).
