WIENER LINIEN

Project Partner

Wiener Linien GmbH & Co. KG
Vienna, Austria

100 buses

Project Highlights

- Automatic Passenger Counting System IRMA on 100 buses
- Interface to existing third-party onboard unit

Interfaces to:

- Planfahrt – evaluation and analysis software system

Vienna is clean, safe, green, alive and one of the most attractive, „livable“ cities in the world. Situated in the heart of Europe, Vienna is a city with rich history and vibrant future, home for artists and art, a top location for „bon vivants“, a pulsating tourist spot with excellent accessibility. „Vienna is different“ was the slogan used by the Vienna City Administration a few years ago to promote the Austrian federal capital of close to 2 million inhabitants, and it perfectly captured the atmosphere of this city on the Danube.
